

Question 2

2. What are HTML entities? Can you list 5 commonly used HTML entities?

****Answer:**

It is special special so we can use in **HTML** to make that character reliably appear.

HTML entities are special codes used to represent characters that have a special meaning in HTML. Here are five commonly used HTML entities:

- ` `; (non-breaking space)
- `<`; (less than sign `<`)
- `>`; (greater than sign `>`)
- `&`; (ampersand `&`)
- `"`; (double quotation mark `"`)
